Overview

Milestone Millions (\$MSMIL) is a unique rewards type of token which currently runs in an Ethereum IBFT 2.0 Proof of Authority (PoA) side chain (Bitrock).

The following pairings are available on DEX/CEX:

- MSMIL/BROCK
- MSMIL/USDT (Dex-trade)
- MSMIL/ETH (coming soon on Dex-trade)

Milestone Millions will be integrating with additional chains in the future through various utilities being developed.

Milestone Millions utilizes multiple revenue streams, from direct rewards garnered from the transactions, to key investment positions in various ecosystems. Milestone Millions is poised to provide sustainable growth to our holders through various investments and revenue sharing opportunities.

Milestone Millions is designed to allow investors to earn rewards & dividends by holding the project utility token \$MSMIL. The more token holders have, the larger the rewards.
